Three phase-coded output settings

```
s0 = (+,+,+)    x0 =  r12 + r13 + r23
s1 = (+,-,+)    x1 = -r12 + r13 - r23
s2 = (+,+,-)    x2 =  r12 - r13 - r23
```

Reconstruction:

```
r12 = (x0+x2)/2
r13 = (x0+x1)/2
r23 = -(x1+x2)/2
```
